

Mercedes Gargallo

Mercedes is a qualified architect and holds a master's degree in façade engineering. She has 15 years of work experience including ten years at Arup where she works as an Associate in the Buildings team in Dubai.

She has extensive expertise in the design of building envelope systems using a wide range of materials. She has been involved in the engineering, tendering, testing and site installation of numerous high profile projects alongside some of the most prestigious architectural firms globally. Her work with AHMM on the refurbishment of Regent Street W4 in London received the International Award for Façade Engineering Excellent in the Refurbishment category in 2016. She has working experience in the Middle East, UK, Mexico and Europe.

Mercedes has recently led the Arup team to contribute to the One Planet Network's SBC study regarding the state of play of circular economy in the built environment in the GCC countries.
