

Carolin Spirinckx

Carolin is project manager and activity leader market in the team working on Sustainable Built Environment in the unit Smart Energy and Built Environment of VITO and EnergyVille. She has an extensive experience in sustainability evaluations in general and more specifically within the built environment, a.o. life cycle assessment (LCA), carbon footprint (CF), product environmental footprint (PEF), and circularity assessment. Over the years Carolin has built up a comprehensive knowledge in the field of sustainable chain management. She has been involved in the performance of different LCA/EPD/PEF projects in which widely differing product types have been analysed, with both government and industry as target groups. Carolin is also actively involved in several PEF (Product Environmental Footprint) projects of the EC and the LEVEL(s) framework. Furthermore Carolin is a member of the Editorial Board of the International Journal of Life Cycle Assessment and scientific board member of several conferences.
