

Jeremy Gibberd

Jeremy Gibberd is an Architect and Researcher who has been involved in a wide range of sustainability projects in Africa. Recently, he has collaborated with UNEP, UNHabitat and the One Planet Network on projects that explore the development of new circular and sustainable models for built environments and materials in developing contexts.

He is an adjunct professor at Nelson Mandela University, coordinates CIB's Working Group (W116) on Smart and Sustainable Built Environments (SASBE) and is a member of the Multi-stakeholder Advisory Committee (MAC) of UNEP's Sustainable Building and Construction programme.
