

Joeri Beneens

Joeri Beneens has gained a broad and deep knowledge of construction during his career. His company mainly makes total projects where they can carry out almost all aspects in-house.

He puts a lot of energy into searching for and optimizing sustainable construction methods. He is very involved with the BBRI in various technical committees such as TC Smart & Sustainable Constructions and TC SSC/WG-GT Environmental Impact. Previous subsidy processes such as collaborations with the WTCB, VITO, Bouwunie and Thomas More were always completed positively and successfully. From the start of the Green Deal, his involvement was great by submitting various example projects to the GDCB.
